EDUCATION

Saint Louis University

August 2021 - July 2025

Bachelor of Science in Information and Technology

Assessed by the Department of Training and Workforce Development as comparable to the Australian Bachelor's Degree

- **GWA:** 2.0 / 5.0 (Philippine inverted scale — 87% average, equivalent to Australian Distinction)
- **Relevant Coursework:** Programming, Data Structures, Data Analytics, Data Mining, Web Development, Machine Learning, Database Management System, Application Development, Computer Network, Cybersecurity, Project Management

WORK EXPERIENCE

Barrier Reef Pools

Mould Technician

March 2026 - Present

- Maintain structured defect logs, maintenance schedules, and QC reports with high accuracy, applying documentation and data recording practices transferable to IT ticketing and incident reporting
- Diagnose equipment faults, identify underlying causes, and prioritise corrective actions under time pressure, while coordinating task handovers and communicating fault statuses within the department

Saint Louis University - Baguio, Philippines

Full Stack Web Developer Intern

January 2025 - May 2025

- Gathered stakeholder requirements, coordinated task assignments, and led testing as Assistant Team Lead throughout the full development cycle
- Provisioned and maintained 200+ Windows and Mac lab workstations, deploying XAMPP/WAMP stacks, upgrading RAM, replacing peripherals, and crimping Ethernet cables to sustain zero-downtime lab availability

Self-Employed

Freelance IT Technician & Technical Consultant

August 2022 - June 2025

- Debugged and resolved errors in Java and web development projects (HTML, CSS, JavaScript) for 3+ clients, improving code functionality and project structure
- Delivered hardware servicing to 5+ clients including RAM upgrades, thermal paste replacement, and PC assembly, retaining 3 out of 8 clients for repeat engagements through reliable service delivery

PROJECTS

Inventory Management System | Internship Project

- Engineered a full-stack IMS using PHP, JavaScript, Bootstrap, and MySQL with RBAC and audit logging, reducing data retrieval time by 60% through indexing, pagination, and query optimisation
- Built configurable reporting with Excel/PDF/Word export formats and led testing as Assistant Team Lead, eliminating recurring manual reporting tasks

NaviBot – Generative AI Enrollment Chatbot | Capstone Project

- Fine-tuned a BART language model on a domain-specific Q&A dataset and deployed it behind a Flask REST API integrated into a mock student portal (HTML, CSS, JavaScript)
- Evaluated multiple model variants using BERTScore, BLEU, and ROUGE metrics to validate contextual accuracy and language fluency

Crime Pattern Analysis – ML Predictive Model | Academic Project

- Preprocessed five years of crime records (2018–2023) and applied K-Means clustering to segment data into 4 distinct crime-demographic profiles, uncovering key behavioural associations
- Implemented Sequential Pattern Mining (SPM) to identify recurring offence sequences and timing trends, translating raw data into actionable prevention insights

SKILLS

Languages: Python, PHP, Java, JavaScript, TypeScript

Frameworks/Libraries: React, Node.js, Flask, Bootstrap, Tailwind CSS, pandas, NumPy, scikit-learn, PyTorch

Data & Analytics: Data Analysis, Data Science, Data Visualisations, Watson Studio (IBM)

Databases: MySQL

Tools & Platforms: Git, VS Code, XAMPP, WAMP, GitHub, Vercel

CMS & Other: WordPress, Joomla, Microsoft Office

CERTIFICATIONS & CREDENTIALS

IBM Data Fundamentals | IBM | May 2026

Hackfinity Battle Cybersecurity Challenge | TryHackMe | Apr 2025
