EDUCATION

Saint Louis University

August 2021 - July 2025

Bachelor of Science in Information and Technology

Assessed by the Department of Training and Workforce Development as comparable to the Australian Bachelor's Degree

- **GWA:** 2.0 / 5.0 (Philippine inverted scale — 87% average, equivalent to Australian Distinction)
- **Honour/Award:** Dean's List
- **Relevant Coursework:** Programming, Data Structures, Data Analytics, Data Mining, Web Development, Machine Learning, Database Management System, Application Development, Computer Network, Cybersecurity, Project Management

EXPERIENCE

Barrier Reef Pools

March 2026 - Present

Mould Technician

- Document and track defect conditions, maintenance schedules, and QC reports with high accuracy, reflecting strong technical documentation and data recording practices
- Diagnose equipment faults, prioritise corrective actions under time pressure, and adapt to shifting production demands, skills directly transferable to IT troubleshooting and task management

Saint Louis University - Baguio, Philippines

January 2025 - May 2025

Full Stack Web Developer Intern

- Engineered a full-stack Inventory Management System (PHP, JavaScript, Bootstrap, MySQL) with RBAC and trigger-based audit logging, cutting table data retrieval time by 60% via MySQL indexing, pagination, and query optimisation
- Built configurable reporting with selectable columns and Excel/PDF/Word export formats, eliminating recurring manual reporting tasks and reducing staff support requests
- Gathered stakeholder requirements, coordinated task assignments, and led testing as Assistant Team Lead throughout the full development cycle
- Provisioned and maintained 200+ Windows and Mac lab workstations, deploying XAMPP/WAMP stacks, upgrading RAM, replacing peripherals, and crimping Ethernet cables to sustain zero-downtime lab availability

Self-Employed

August 2022 - June 2025

Freelance IT Technician & Technical Consultant

- Debugged and resolved errors in Java and web development projects (HTML, CSS, JavaScript) for 3+ clients, improving code functionality and overall project structure
- Delivered hardware servicing to 5+ clients, including RAM upgrades, thermal paste replacement, and deep cleaning on laptops and desktops
- Assembled and configured custom desktop PCs based on client specifications, ensuring hardware compatibility and performance
- Retained repeat clients through consistent and reliable service delivery, with 3 out of 8 clients returning for additional engagements

PROJECTS

NaviBot – Generative AI Enrollment Chatbot | *Capstone Project*

- Fine-tuned a BART language model on a domain-specific Q&A dataset (SLU enrollment) to automate responses to common student inquiries, reducing reliance on in-person staff during peak periods
- Deployed the model behind a Flask REST API and integrated it into a mock student portal UI (HTML, CSS, JavaScript), simulating a production-ready web environment
- Evaluated response quality across multiple model variants using BERTScore, BLEU, and ROUGE metrics to validate contextual accuracy and language fluency

Crime Pattern Analysis – ML Predictive Model | *Academic Project*

- Cleaned and preprocessed five years of crime records from Colorado Springs (2018–2023), resolving missing values, encoding categorical variables, and standardising features for ML readiness
- Applied K-Means clustering to segment data into 4 distinct crime-demographic profiles, uncovering key associations such as links between DUI offences and related criminal behaviour
- Implemented Sequential Pattern Mining (SPM) to identify recurring offence sequences and timing trends, translating raw data into actionable insights for targeted prevention strategies

Anime & Manga Browser – REST API Web App | *Academic Project*

- Built a web app integrating the Jikan API v4 (MyAnimeList) with dynamic search, filtering, and async content rendering using HTML, CSS, and JavaScript

Personal Developer Portfolio | *Personal Project*

- Designed and deployed a responsive portfolio site using React, Vite, and Tailwind CSS as a live professional showcase for recruiters

SKILLS

Languages: Python, PHP, Java, JavaScript, TypeScript

Frameworks/Libraries: React, Node.js, Flask, Bootstrap, Tailwind CSS, pandas, NumPy, scikit-learn, PyTorch

Data & Analytics: Data Analysis, Data Science, Data Visualisations, Watson Studio (IBM)

Databases: MySQL

Tools & Platforms: Git, VS Code, XAMPP, WAMP, GitHub, Vercel

CMS & Other: WordPress, Joomla, Microsoft Office

CERTIFICATIONS & CREDENTIALS

IBM Data Fundamentals | IBM | May 2026

Hackfinity Battle Cybersecurity Challenge | TryHackMe | Apr 2025

Python Development and Python Programming Fundamentals | Udemy | Nov 2024

Foundations of Web Development: CSS, Bootstrap, JS, React | Udemy | Oct 2024
